WOOD STRUCTURAL PANEL BOX HEADER FOR LOAD-BEARING WALLS

The top and bottom plates of the wood structural panel box header shall be continuous with no vertical joints in the wood structural panel over opening. For construction details and maximum spans, see 2012 IRC Section R602.7.2, Figure R602.7.2 and Table R602.7.2.

Notes:
1. Framing fastening per code.
2. For engineered box headers with wood structural panels, refer to Nailed Structural-Use Panel and Lumber Beams, Form Z416.
